Provo, Utah

## Mission Statement

I'm first and always an advocate for the user, the people my product serves. I learn by observation and conversation. I gather people's stories to inspire my work. I'm mindful of the big picture and I stress about each pixel. I simplify the complex, make the mundane beautiful, and the tedious enjoyable. By balancing the needs of users, the requirements of business, and the capabilities of technology I create innovative solutions, products, and experiences.

## Work Experience

### Xactware

Dec. '16 - Present

As a member of the online insurance claims management team I create solutions to help insurance companies and those it works with help people get their homes in order after a disaster.

### Overstock.com Internship

Nov. '15 - Jan. '16

As a UX Product Design intern at Overstock I used a user-centered design method to help improve and create delightful shopping experiences for customers.

### Axis41

Feb. '16 - Nov. '16

Axis41 is a full service digital agency. As a user experience designer at Axis41 I work with researchers, strategists, and others to create the solutions our clients seek for the people they serve.

### DESIGNATION Labs

Jun. - Sept. '15

DESIGNATION is a selective internship experience that is a combination of intensive coursework and client projects where I solved real problems for real people and companies.

## Education

Brigham Young University     B.S. Technology and Engineering Education     2007-2012

## Tools & Methods

Sketch • Invision • Flinto • Lean UX • Human Centered Design • Jobs to be Done
